anda Lang Schumacher

t Professor, Division of Biostatistics
of Public Health, The Ohio State University

all, 1841 Neil Avenue, Columbus, OH 43210
313@osu.edu

Updated October 20, 2026

Education

-2021 **Ph.D. in Statistics.** State University of Campinas (UNICAMP), Campinas, SP, Brazil. Advisors: Larissa Avila Matos and Victor Hugo Lachos Davila.

-2016 **M.Sc. in Statistics.** State University of Campinas (UNICAMP), Campinas, SP, Brazil. Advisors: Victor Hugo Lachos Davila and Filidor Vilca Labra.

-2014 **B.S. in Statistics.** State University of Maringa (UEM), Maringa, PR, Brazil. Graduated with honors.

experience

–present **Assistant Professor**, Division of Biostatistics, College of Public Health, The Ohio State University, Columbus, OH, USA.

-02/2018 **Statistician**, Technologist in geographic and statistical information, Brazilian Institute of Geography and Statistics (IBGE), Rio de Janeiro, RJ, Brazil.

-12/2017 **Instructor**, Department of Statistics, National School of Statistical Sciences (ENCE), Rio de Janeiro, RJ, Brazil.

-07/2014 **Project director and founding member**, *Estats Consultoria* (junior company of statistical consulting), UEM, Maringa, PR, Brazil.

nd awards

26 IBS-CWS Florence Nightingale Award.

25 Jacob Palis Award (Fulbright Brazil). In collaboration with Rojas Guerra, R., Figard, R., Fontana Ribeiro, T., and Pena-Ramirez, F. A.

24 CAPES visiting scholar travel award.

23 IMS New Researchers Conference travel award.

21 Winner of the competition for students of statistics in association with the Conference in Honour of Fred Smith and Chris Skinner.

18 Second place, Best Master's Thesis contest, 23rd SINAPE.

h interests

- Censored regression models
- DNA methylation patterns
- Linear and nonlinear mixed-effects models
- Longitudinal models
- Missing data analysis
- Multiple sclerosis disease
- Robust models
- Skew-elliptical and elliptical distributions
- Variable selection for mixed models

d contracts

Active

-06/2027 **NMSS BI-2306-41591** (PI: Schumacher). Epigenetics in MS: An evaluation of biological aging and disease severity. Role: Principal Investigator (30% support).

-07/2027 **IPR Seed Grant** (PI: Schumacher). More Than a Number: Bayesian Frameworks for Uncertainty Propagation on Epigenetic Clock Predictions. Role: Principal Investigator.

-06/2029 **NIH/NIA K23 AG084848** (PI: Yinan Zhang). Associations of biological aging with outcomes and immune

dysregulation in multiple sclerosis. Role: Co-Investigator (5% support).

Completed

-05/2025 **NIH/NIA R03AG078946** (PI: Yinan Zhang). Markers of Biological Aging in Multiple Sclerosis. Role: Biostatistician (5–10% support).

-05/2025 **NIH/NICHD R01HD091274-01A1** (PI: Maria Gallo). Postpartum Family Planning. Role: Co-Investigator (10% support).

rofessional esentations

Conferences

1. Flexible joint models for clinical outcomes with skewed and heavy-tailed random effects. **Topic-contributed paper session.** ASA Joint Statistical Meetings 2026, Boston, MA, USA.
2. A robust multilevel framework for modeling longitudinal bilateral manual dexterity in multiple sclerosis. **Oral-contributed presentation.** 33rd International Biometric Conference, Seoul, South Korea.
3. Bayesian robustness for longitudinal data: scale mixture of skew-normal linear mixed models via HMC. **Poster presentation.** 2026 ISBA World Meeting, Nagoya, Japan.
4. Sandwich variance estimation in scale mixture of skew-normal linear mixed models. **Oral-contributed presentation.** ENAR 2026, Indianapolis, IN, USA.
5. Association between epigenetic aging markers and MS disease outcomes. **Poster presentation.** ACTRIMS Forum 2026, San Diego, CA, USA.
6. Censored linear mixed-effects models for heavy-tailed irregularly observed longitudinal data. **Invited session.** 65th ISI World Statistics Congress, 2025, The Hague, Netherlands.
7. Statistical pitfalls in measuring biological aging with epigenetic clocks: insights from a chronic disease setting. **Plenary talk.** 69ª RBras and 21º SEAGRO, Vitoria, ES, Brazil.
8. EMLMLasso: an EM algorithm implementation for regularization in high-dimensional linear mixed models. **Poster presentation.** ENAR 2025, New Orleans, LA, USA.
9. What are we measuring with epigenetic clocks in people with MS? **Poster presentation.** ACTRIMS Forum 2025, West Palm Beach, FL, USA.
10. Assessment of biological aging in people with multiple sclerosis based on epigenetic clocks. **Poster presentation.** 10th Tykeson Fellows Conference, 2024, National Multiple Sclerosis Society, Denver, CO, USA.
11. Challenges in assessing biological aging in people with multiple sclerosis based on epigenetic clocks. **Invited session.** 37th New England Statistics Symposium, 2024, University of Connecticut, Storrs, CT, USA.
12. Bayesian scale mixture of normal censored linear mixed models with within-subject serial dependence. **Invited session.** CMStatistics 2023, Berlin, Germany.
13. Variable selection in high-dimensional linear mixed-effects models. **Contribución científica.** Vigésimas Jornadas en Estadística, 2023, Guayaquil, Ecuador.
14. Panel on how to join and explore pharma. **Panelist.** Statistics in Pharmaceuticals, 2023, Storrs, CT, USA.
15. Robust mixed models for longitudinal data: model fitting and evaluation. **Speed presentation.** ASA Joint Statistical Meetings 2023, Toronto, Canada.
16. EM algorithm for regularization problems in high-dimensional LMMs. **Flash talk.** IMS 23rd Meeting of New Researchers in Statistics and Probability, 2023, Toronto, Canada.

17. Bayesian estimation in scale mixture of skew-normal linear mixed models using Hamiltonian Monte Carlo. **Oral presentation.** ISI 64th World Statistics Congress, 2023, Ottawa, Canada.
18. Censored autoregressive regression modeling using the R package ARCensReg. **Oral presentation.** 24th International Conference on Computational Statistics, 2022, Bologna, Italy.
19. Modeling longitudinal data using robust mixed models in R. **Tutorial.** 24º Simpósio Nacional de Probabilidade e Estatística (SINAPE), 2022, Gramado, RS, Brazil.
20. Censored autoregressive regression models with Student-t innovations. **Oral presentation.** ICSA 2022 Applied Statistics Symposium, 2022, Gainesville, FL, USA.
21. Canonical fundamental skew-t linear mixed models. **Oral presentation.** III Jornadas Ecuatorianas en Matemáticas, 2021, Ecuador (virtual).
22. Scale mixture of skew-normal linear mixed models with within-subject serial dependence. **Poster presentation.** 34th New England Statistics Symposium, 2021, Providence, RI, USA.
23. skewlmm: an R package for robust estimation of linear mixed models based on scale mixture of skew-normal distributions. **Poster presentation.** ISI World Statistics Congress 2021.
24. Canonical fundamental skew-t linear mixed models. **Oral presentation** (Student Prize Session). Conference in Honour of Fred Smith and Chris Skinner, 2021 (virtual satellite meeting of the ISI World Statistics Congress).
25. Scale mixture of skew-normal linear mixed models with within-subject serial dependence. **Oral presentation** (Organized Invited Session). 4th International Conference on Econometrics and Statistics, 2021, Hong Kong (virtual).
26. Robust estimation in linear mixed models using the R package skewlmm. **Oral presentation.** XV Encontro Científico de Pós-Graduandos do IMECC, November 2020, Campinas, SP, Brazil (virtual).
27. Autoregressive scale mixture of skew-normal linear mixed models. **Poster presentation.** VI Workshop em Análise de Sobrevivência e Aplicações (WASA), November 2019, Piracicaba, SP, Brazil.
28. Influence diagnostics for censored regression models with autoregressive errors. **Oral presentation.** XVI Escola de Modelos de Regressão (EMR), March 2019, Pirenópolis, GO, Brazil.
29. Censored regression models with autoregressive errors. **Oral presentation.** 23º Simpósio Nacional de Probabilidade e Estatística (SINAPE), September 2018, São Pedro, SP, Brazil.
30. *Imputação de dados faltantes em séries temporais.* **Poster presentation.** XIV EMR, March 2015, Campinas, SP, Brazil.
31. *Modelos estruturais em séries temporais com aplicação em dados de internação por bronquiolite.* **Oral presentation.** 59ª RBras, May 2014, Ouro Preto, MG, Brazil.

Guest lectures

1. Guest speaker discussing difference-in-differences models. VETPREV 8725: Quantitative Methods Capstone, The Ohio State University, February 20, 2025.

Other invited presentations

1. Beyond normality: flexible linear mixed models for repeated measurements. **Seminar.** Quantitative Psychology Program, Department of Psychology, The Ohio State University, Columbus, OH, USA, September 21, 2026.
2. Flexible longitudinal models and epigenetic aging markers in multiple sclerosis. **Seminar.** Department of Biostatistics & Informatics, Colorado School of Public Health, University of Colorado Anschutz Medical Campus, Aurora, CO, USA, September 9, 2026.
3. The use of AI in research and teaching of biostatistics at OSU. **Seminar.** Department of Mathematics and Statistics, Federal University of São João del-Rei, São João del-Rei, MG, Brazil, December 11, 2025.
4. Challenges in longitudinal data analysis: complex made simple with the R package skewlmm. **Seminar.** 2024 Fall Speaker and Annual Banquet, Columbus ASA Chapter, Columbus, OH, USA, September 16, 2024.
5. Lessons from an ethics in biostatistics course. **Seminar.** Department of Statistics, University of Campinas, Campinas, SP, Brazil, July 12, 2024.
6. Scale mixture of skew-normal linear mixed models: a Bayesian approach using Hamiltonian Monte Carlo. **Seminar.** Department of Bioinformatics and Biostatistics, University of Louisville, Louisville, KY, USA, January 26, 2024.
7. Penalized estimation of scale mixture of skew-normal linear mixed models using Hamiltonian Monte Carlo.

Seminar. Division of Biostatistics and Bioinformatics, University of Cincinnati, October 27, 2023.

8. Penalized estimation of scale mixture of skew-normal linear mixed models using Hamiltonian Monte Carlo. **Seminar.** Department of Statistics, The Ohio State University, October 19, 2023.
9. Penalized estimation of scale mixture of skew-normal linear mixed models using Hamiltonian Monte Carlo. **Colloquium.** Department of Statistics, Federal University of Minas Gerais, September 22, 2023.
10. A trajetória acadêmica e uma introdução a modelos mistos para dados longitudinais. **Invited lecture.** Department of Statistics, State University of Maringa, March 23, 2022.
11. Robust mixed-effects models for longitudinal data. **Colloquium.** Department of Statistics, University of Connecticut, November 17, 2021.
